EXPERIENCE

Microsoft - Senior Product Designer, Microsoft Fabric

Aug 2022 - Present, California

- Owned end-to-end UX for **dbt Job in Fabric** from 0 to 1 through **General Availability**, a SQL based transformation editor running natively on a schedule inside Fabric instead of on separate infrastructure; carries a 10,000 MAU growth target and anchors Microsoft's public dbt Labs and dbt Fusion partnership.
- Led design for the Transformations space (Dataflows Gen2, mapping data flows, dbt job) and the upgrade path off Azure Data Factory, achieving \$204M ARR and a 39,000+ customer installed base; delivered upgrade experience for Dataflow Gen1→Gen2.
- Led design for Copilot-powered authoring in Fabric Data Factory, letting engineers describe a transformation, pipeline, or expression in natural language and turning cryptic run failures into guided fixes; grew to 10,532 monthly active users across 5,192 tenants, a 2x increase in two months, and delivered the product's two most-used Copilot skills, **featured in the FabCon 2025 keynote**.
- Championed a unified, persistent Copilot for Fabric, replacing per-workload assistants that forgot context on navigation; defined reusable patterns adopted across Data Factory, Data Cloud Studio, and Power BI, **presented in a Gartner analyst demo**.
- Spearheaded UX design and guidelines for Mirroring, which keeps a live copy of an operational database in OneLake without pipeline upkeep; **shipped Cosmos DB and SQL DB to Public Preview at FabCon 2024** on a platform later extended to BigQuery and SAP Datasphere.
- Designed Copy Job, the simplest way to bring data into Fabric from 80+ sources without building a pipeline, including incremental mode, **now GA** at 34.6K developer MAU and 87K active artifacts.

Juniper Networks - UX Designer II

May 2020 - Aug 2022, California

- Innovated and patented the logical view of a 5G Tracking Area Visualization** and cell site management system, letting network engineers provision network slices and services without parsing raw topology data; cut provisioning time by 35% across 12+ enterprise deployments.
- Created and maintained Juniper's design system guidelines, standardizing patterns and components across 8 product lines to speed delivery and cut design-to-dev inconsistency.
- Ran UX research studies with 50+ network engineers to iterate on designs, improve usability, and shape product vision across the networking product line.
- Innovated and patented an augmented-reality troubleshooting application** enabling network admins to remotely debug data center hardware, reducing on-site truck rolls by an estimated 40%.
- Designed the topology view and treemap analysis for the Juniper Fabric Management dashboard, partnering with PMs and engineers to help customers visualize critical fabric data in real time across data centers with 1,000+ nodes.

1mg - UX Engineer

Oct 2018 - Apr 2019, New Delhi

- Spearheaded the redesign of the Diabetes Care Plan subscription model, building a dashboard to monitor Hba1c levels and increasing user conversion by 30%.
- Mentored five new graduate hires in developing a B2B application and facilitated usability testing with designers on the final product, driving an 18% revenue increase.

ZNSofter - UX Engineer

Sep 2017 - Oct 2018, New Delhi

- Delivered a streamlined mobile ticketing app for London-based soccer clubs, cutting stadium entry verification time by 80% and growing sales leads.

EDUCATION

M.S., Human-Computer Interaction & Design - Indiana University, Bloomington

May 2021 · GPA 4.0

B.Tech., Computer Science & Engineering - Indira Gandhi Delhi Technical University for Women

Jun 2017

AWARDS & RECOGNITION

- Delivered a talk** on "From Idea to Innovation: What's Next in Data Factory Design" at FabCon 2025 at Las Vegas, Nevada
- Recognized in the Azure Data Quality & Security Excellence Program (QSEP)** for Secure-by-Default UX on Data Factory shaping UX patterns for correctness and recovery at scale as Data Factory grew to 22.05B pipeline activity runs/month, up from 18.38B YoY.
- Invited as a **Judge** at the Microsoft Global Hackathon 2026 and Google Developers Group DevFest Bay Area 2026, evaluating AI and product submissions from hundreds of teams worldwide.
- Named **GHC Scholar**, top 2% of 5,000+ applicants, 2020; spoke at ACM Richard Tapia (2020), Juniper Women Inspirational Network (2020), and FOSSASIA (2018).
